ELSEVIER

Robotics and Autonomous Systems 23 (1998) 315–316

Robotics and Autonomous Systems

Contents Volume 23

Special Issue: Space Robotics in Europe
Guest Editor: Peter Putz

P. Putz, Guest editorial: Space Robotics in Europe 1

P. Putz, Space robotics in Europe: A survey 3

R. Boumans and C. Heemskerk, The European Robotic Arm for the International Space Station 17

F. Didot, J. Dettmann, S. Losito, D. Torfs and G. Colombina, JERICO: A demonstration of autonomous robotic servicing on the Mir space station 29

S. Di Pippo, G. Colombina, R. Boumans and P. Putz, Future potential applications of robotics for the International Space Station 37

G. Visentin and D.L. Brown, Robotics for geostationary satellite servicing 45

M. Novara, P. Putz, L. Maréchal and S. Losito, Robotics for lunar surface exploration 53

A. Chicarro, G. Scoon and P. Putz, Scientific applications of robotic systems on planetary missions 65

E. Pozzi and R. Mugnuolo, Robotics for ROSETTA cometary landing mission 73

R. Mugnuolo, S. Di Pippo, P.G. Magnani and E. Re, The SPIDER manipulation system (SMS) The Italian approach to space automation 79

L. Boissier, IARES-L: A ground demonstrator of planetary rover technologies 89

G. Hirzinger, B. Brunner, K. Landzettel and J. Schott, Preparing a new generation of space robots – A survey of research at DLR 99

L. Richter, K. Schilling, M.C. Bernasconi and C. García-Marirrodriga, Mobile Micro-Robots for scientific instrument deployment on planets 107

L. Richter, Principles for robotic mobility on minor solar system bodies 117

Robotics Competition Corner

Calendar

P. Svestka and M.H. Overmars, Coordinated path planning for multiple robots 125

H. Sutanto, R. Sharma and V. Varma, The role of exploratory movement in visual servoing without calibration 153

W.L. Xu, S.K. Tso and Y.H. Fung, Fuzzy reactive control of a mobile robot incorporating a real/virtual target switching strategy 171

A.V. Topalov, J.-H. Kim and T.P. Proychev, Fuzzy-net control of non-holonomic mobile robot using evolutionary feedback-error-learning 187

Robotics Competition Corner

Calendar

H.I. Christensen and J.L. Crowley, Editorial: Intelligent Robotics Systems – SIRS'97 201

M. Beetz, W. Burgard, D. Fox, A.B. Cremers, Integrating active localization into high-level robot control systems 205

J. Santos-Victor, Vision-based remote control of cellular robots 221

K.M. Dawson-Howe and T.G. Williams, The detection of buried landmines using probing robots 235

G. Lacey and K.M. Dawson-Howe, The application of robotics to a mobility aid for the elderly blind 245

P. Pirjanian, H.I. Christensen and J.A. Fayman, Application of voting to fusion of purposive modules: An experimental investigation 253

J.L. Crowley, F. Wallner and B. Schiele, Position estimation using principal components of range data 267

C.B. Madsen and C.S. Andersen, Optimal landmark selection for triangulation of robot position 277

P. Weckesser and R. Dillmann, Modeling unknown environments with a mobile robot 293

Robotics Competition Corner 301

Annoucement 303

Biometric Robotics, Special Issue of Robotics and Autonomous Systems (Call for Papers) 305

Calendar 307
